# Assignment - 04

# Insurance Claim Request Form — Basic Fields Use Case in Zoho Creator

**Name:** Sowbarniga A

**REG NO:** 241401104

**Programme:** B.Tech CSBS

## AIM

To design and build a functional “Insurance Claim Request & Processing Management” application in Zoho Creator that demonstrates the correct use of all thirteen Basic Fields available in the Form Builder, and solves a real insurance-servicing requirement of collecting and pre-processing claim requests from policyholders through a structured Claim_Request_Form and an auto-generated Claim_Request_Report.

241401104

## PROCEDURE

### 1. Application and Form Creation

- Logged into Zoho Creator and created a new application named “Insurance Claim Request & Processing Management”.
- Inside the application, opened the Form Builder and created the form **Claim_Request_Form**.
- The form was designed to capture claimant identity, contact details, policy details, incident description, claim amount, supporting documents available, and a declaration of authenticity.
- Zoho Creator automatically generated a linked report, **Claim_Request_Report**, for viewing, filtering and managing submitted claim requests.

### 2. Drag-and-Drop of Basic Fields

The Basic Fields palette was expanded on the left panel. All thirteen fields were dragged onto the form canvas and configured through the Field Properties panel.

| Basic Field | Field Name | Configuration |
|---|---|---|
| Name | Claimant_Name | First Name and Last Name enabled; marked Mandatory. |
| Email | Email_Address | Built-in email format validation enabled; used for claim status updates and acknowledgement email. |
| Address | Residential_Address | Address components (street, city, state, pincode) enabled. |
| Phone | Contact_Number | Country code format enabled for Indian numbers; marked Mandatory. |
| Single Line | Policy_Number | Short free-text entry for the policy number; marked Mandatory. |
| Multi Line | Incident_Description | Free-text description of the incident and circumstances leading to the claim. |
| Number | Claim_Amount_Requested | Restricted to positive values only; marked Mandatory. |
| Date | Date_Of_Incident | Date picker; future dates disallowed; marked Mandatory. |
| Time | Preferred_Callback_Time | Used to select the preferred time for a callback from the claims officer. |
| Drop Down | Claim_Type | Single-select list of claim categories such as Motor Insurance, Health Insurance, Life Insurance, Property Insurance and Travel Insurance; marked Mandatory. |
| Radio | Claimant_Type | Mutually exclusive options: Policyholder, Nominee, Third Party. |
| Multi Select | Supporting_Documents_Available | Allows one or more documents such as Photographs, Police FIR Copy, Repair Estimate, Medical Bills. |
| Checkbox | Declaration_Of_Authenticity | Declaration that the information provided is true and accurate; mandatory. |

24140104

## 3. Form Sections

The Claim_Request_Form was organised into the following sections:

**Section A — Claimant Details**

- Claimant Name (First Name, Last Name)
- Claimant Type (Radio: Policyholder / Nominee / Third Party)
- Policy Number (Single Line)

**Section B — Contact Details**

- Email Address
- Contact Number
- Residential Address

**Section C — Claim Details**

- Claim Type (Drop Down)
- Date of Incident
- Claim Amount Requested
- Supporting Documents Available (Multi Select)
- Incident Description (Multi Line)

**Section D — Scheduling & Declaration**

- Preferred Callback Time
- “I declare that the information provided is true and accurate” (Checkbox)

24140 1104

## 4. Configuring Field Properties and Validations

- Marked Claimant Name, Phone, Policy Number, Claim Type, Date of Incident, Claim Amount Requested and the Declaration checkbox as Mandatory.
- Enabled built-in email format validation on the Email Address field.
- Enabled the country code format on the Contact Number field for Indian numbers.
- Restricted Claim Amount Requested to a positive value only.
- Restricted Date of Incident so that future dates are not allowed.
- Configured the Declaration checkbox as mandatory so the form cannot be submitted unless it is checked.
- Configured Claimant Type as a Radio field with a single mandatory selection.
- Configured Supporting Documents Available as a Multi Select field.

## 5. Workflow

1. The claimant opens the public form link shared on the insurer's website or via the policy servicing email.
2. The claimant fills in personal, policy, incident and scheduling details across the four sections.
3. On clicking Submit, Zoho Creator validates all mandatory fields and formats.
4. A new record is created in the Claim_Request_Report.
5. An automated acknowledgement email, with a reference number, is sent to the address entered in the Email field.
6. The claims team reviews the report, filters by Claim Type and Claim Amount Requested, and assigns an investigator who calls the claimant at the Preferred Callback Time.

## 6. Submitting Sample Records and Reviewing the Report

Three sample claim requests were submitted through the live form.

**Sample Record 1**

- Claimant Name: Lakshmi Narayanan
- Claimant Type: Policyholder
- Policy Number: POL-2024-778812
- Email Address: lakshmi.n@example.com
- Contact Number: +91 95000 33445
- Residential Address: 7, Temple Street, Tirunelveli, Tamil Nadu, 627001
- Claim Type: Motor Insurance
- Date of Incident: 15-Jul-2026
- Claim Amount Requested: 45000
- Supporting Documents Available: Photographs, Police FIR Copy, Repair Estimate
- Incident Description: Vehicle was damaged in a collision at the traffic signal near Anna Nagar on the reported date.
- Preferred Callback Time: 4:00 PM
- Declaration: Checked (Agreed)

**Sample Record 2**

- Claimant Name: Ramesh Kannan
- Claimant Type: Nominee
- Policy Number: POL-2023-445120
- Email Address: ramesh.kannan@example.com

241401104

- Contact Number: +91 93450 66778
- Residential Address: 9, Cross Street, Salem, Tamil Nadu, 636001
- Claim Type: Health Insurance
- Date of Incident: 02-Aug-2026
- Claim Amount Requested: 120000
- Supporting Documents Available: Medical Bills, Discharge Summary
- Incident Description: Hospitalisation for emergency surgery; claim submitted for reimbursement of expenses.
- Preferred Callback Time: 11:30 AM
- Declaration: Checked (Agreed)

**Sample Record 3**

- Claimant Name: Priya Sharma
- Claimant Type: Policyholder
- Policy Number: POL-2025-109834
- Email Address: priya.sharma@example.com
- Contact Number: +91 98765 43210
- Residential Address: 21, Lake View Road, Chennai, Tamil Nadu, 600028
- Claim Type: Property Insurance
- Date of Incident: 25-Jul-2026
- Claim Amount Requested: 80000
- Supporting Documents Available: Photographs, Repair Estimate
- Incident Description: Water damage to the living room ceiling and furniture due to a pipe burst.
- Preferred Callback Time: 2:00 PM
- Declaration: Checked (Agreed)

241401104

After submission, the Claim_Request_Report was opened in list view and all three records were verified. An individual record was opened to confirm that every entered value was stored correctly. Validations were also tested by attempting to submit with the declaration unchecked and with a future incident date; both were rejected.

# OUTPUT

The following screenshots represent the completed application:

**1. Form Builder View — All 13 Basic Fields**

*[Insert screenshot]*

**Fig 1.** Claim_Request_Form in Form Builder showing all thirteen Basic Fields arranged in Sections A to D.

# RESULT

A functional **Insurance Claim Request & Processing Management** application was successfully designed and built in Zoho Creator. The Claim_Request_Form uses all thirteen Basic Fields (Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select and Checkbox) to capture claimant identity, contact details, policy details, incident information, claim amount, supporting documents and a declaration of authenticity. The configured validations worked as expected, and the generated Claim_Request_Report correctly displays the submitted claim requests, enabling the claims team to filter, verify and assign them for investigation and settlement.
